

**Case Consultation Training Series Request for Application
Questions and Answers
December 7, 2015**

I would like to send my 3 clinicians to the training, but I am wondering if all 3 have to go to every training. Would I be able to alternate them?

The expectation is each clinician will attend all the scheduled trainings held twice per month for three hours each session. Three groups of 10-12 clinicians will remain intact throughout the 18 month training period. Maintaining consistent membership throughout the training/consultation program fosters a group process that encourages openness and risk taking on the part of the members. The groups will be offered at different times and clinicians from the same agency will not necessarily be in attendance at the same time.

Also, is this case consultation something I should take, as a supervisor? I thought I read something in the packet about having a separate training for supervisor?

CBH expects to support training for up to 36 clinicians or supervisors through this RFA. A supervisors' track will be developed to support the unique needs of clinical supervisors based on responses to this RFA. This training and consultation opportunity is designed to supplement and grow the skills of clinicians and supervisors currently working with children and families and will offer a range of experience with foundational child and family treatment concepts and skills through case-based consultation. Supervisors will have the opportunity to strengthen their clinical supervision skills through presenting current supervision experiences.

On page 7 of the RFA, there is an indication that Appendix A includes items 1-6, however a review of Appendix A does not show items marked as 1-6. Where are they?

Appendix A is the cover sheet and Appendix B includes items marked 1-4. Appendix A and B should be completed for each provider agency submitting an application.

Any special directions required to fill out Appendix B (Agency Description)?

No special instructions are required.

What about Appendix C? When do we submit that?

Appendix C should be completed by each participant from the provider agency and submitted with Appendix A and B.
