

**Community Behavioral Health: Provider Notification
City Controller's Audit
March 20, 2018**

The City of Philadelphia's Office of the City Controller is conducting an audit of the Department of Behavioral Health & Intellectual disAbility Services (DBHIDS) and Community Behavioral Health (CBH) and its administration of the Behavioral Health Medical Assistance Program. As part of its audit, the Controller's Office has advised that it will conduct site visits, beginning March 21, 2018, to 60 CBH contracted provider agencies over the course of the audit. A focus of the audit is a review of the process for invoicing. We do not have specific details about the visits at this time. If permitted, as additional information becomes available, we will disseminate as appropriate. We appreciate your continued partnership.
